

NEW REGULATION CONCERNING BICYCLES RACKS

NOTICE

Due to the damage to bicycle racks caused by frost and calcium, Transcollines made the decision to remove these during the winter period. However, constructive exchanges with our users made it possible to highlight the importance of using the bike during the winter. As a result, Transcollines has decided to keep bike racks all year round. In addition, starting in the spring of 2019, bike racks will be available at each Transcollines' bus shelter.

The intermodality between public transit and active transportation is a very important concern for Transcollines and the dialogue with our users is at the core of an healthy and open governance.

BIKE TRANSPORT POLICY :

- For safety reasons, the transport of bicycles inside buses is forbidden;
- Transcollines makes bicycle racks available to its users on each of its vehicles, but cannot guarantee places available on them;
- The users have the full and entire responsibility to fix the equipment properly, the drivers cannot intervene;
- During the winter, the mechanisms of bike racks can freeze. Under these circumstances, the driver may refuse the installation of a bicycle to avoid delays or breakage of equipment;
- Under no circumstances may Transcollines, its contractor or the owner of the site be held liable for any damage caused by the use of the equipment.
